Bekasi, Indonesia

I am Gufran Lazuardi, an enthusiastic and results-driven Fullstack Developer with a strong commitment to creating exceptional user experiences. Leveraging my expertise in cutting-edge technologies, including React, Next.js, Express.js, Typescript, Javascript, and Tailwind, along with proficiency in design tools like Figma, I seamlessly fuse creativity with technological sophistication. Additionally, I possess a solid foundation in backend development, including skills in developing and managing relational databases using MySQL, creating RESTful APIs, and implementing authentication and authorization mechanisms. My goal is to consistently deliver visually stunning and seamlessly functional web solutions, ensuring an impactful digital presence and an unparalleled user journey.

- **Languages :** HTML, CSS, Javascript, Typescript
- **Technologies :** React.js, Next.js, Vue.js, Node.js, Express.js, MySQL, Squelize, Prisma, Figma, Jest, Context, Zustand, Tailwind
- **Other** : Algorithms, and Data Structures

Work Experiences

Core Initiative - Jakarta, Indonesia   Mar 2024 – Apr 2024

Frontend Developer – Project Based Internship

Core Initiative is a software development company specializing in financial technology, artificial intelligence, and blockchain. Core Initiative has a team ready to assist your company in solving problems in the most effective and efficient way possible. Core Initiative provides various services dedicated to helping companies advance their business processes. Core Initiative can develop your company's website and help optimize the mobile apps used by the company to market its products.

- I worked closely with designers to translate UI mockups into pixel-perfect front-end components. This involved slicing elements from design assets and building them using a Vue. Focusing on clean and reusable code helped me understand the importance of maintainability in long-term projects.
- My focus on quality extended beyond implementation. I actively participated in writing unit tests for my components using Jest. This not only ensured the reliability of my code but also instilled a strong commitment to quality within me.
- I played a crucial role in integrating these APIs within my front-end components, ensuring smooth data retrieval and manipulation
- I actively contributed to documentation focused on Vue 3, solidifying my knowledge of the framework. Additionally, collaborating on the team's GitHub workflow equipped me with essential skills for seamless version control using Git.

Tiket.com - Jakarta, Indonesia   Oct 2022 – Jan 2024

Product Operations

Tiket.com, a leading travel agency headquartered in Indonesia, has been at the forefront of travel technology since its establishment in August 2011. Specializing in applications and websites designed for both desktop and mobile platforms, Tiket.com seamlessly integrates innovative solutions to provide a comprehensive and user-friendly travel experience. As a key player in the industry, Tiket.com continues to redefine travel services, offering a diverse range of options to cater to the evolving needs of its customers.

- Ensuring precise mapping in the system by rectifying discrepancies between application points and actual locations
- Validate and enhance the clarity of room grouping while ensuring that room specifications align seamlessly with authentic data
- Implemented strategies to unmerge hotels with similar titles at identical location points, optimizing the clarity and accuracy of our hotellistings
- Keeping Tiket.com competitive by dynamically updating top hotel prices based on market adjustments, ensuring alignment with fixed prices in competitor applications
